Forecast for Sunday 06 Sep 2020

Weather: Occasional showers during the early hours of Sunday may become more frequent and locally heavy around dawn. These heavier showers will quickly ease leaving sunny spells and isolated mainly light rain showers through the rest of the morning and afternoon. Becoming dry with clearing skies during the evening.

Chance of cloud free mountain/hill tops above 600m: 70% during the early hours with patchy cloud near 700m, but falling to 20% towards around dawn as more extensive cloud develops near 500m. Improving to 90% around midday as cloud lifts and breaks to leave only patches near 800m, and becoming 100% by evening.

Visibility: Generally very good with clear views of distant hills, but deteriorating to locally moderate in any heavier showers, and very poor at times on the highest routes when any cloud covers the summits.

Forecast for Monday 07 Sep 2020

Weather: Dry with clear spells during the early hours of Monday, with patchy fog forming in some valleys towards dawn. Any fog will quickly clear as a blanket of cloud spreads in from the west, with outbreaks of patchy light rain developing by mid-morning. The rain will continue on and off through the rest of the day, and will be most persistent across western areas of the Brecons, whilst there may be occasional drier interludes in sheltered parts of the east.

Maximum wind: West to southwesterly 20-25mph gust 30-35mph.

Chance of cloud free mountain/hill tops above 600m: 100% at first then falling to 60% by mid-morning as patchy cloud develops near 600m, then deteriorating to 20% or less early afternoon onwards as extensive cloud forms nearer 500m, with patches as low as 400m on exposed west facing slopes later in the afternoon and evening.

Visibility: Generally good at first, but locally very poor in valley fog around dawn. Deteriorating to become generally moderate by midday with views of nearby hills appearing misty, and locally poor in rain in the afternoon. Very poor on the higher routes when cloud lowers to cover the summits.

Temperature: **Valleys:** Plus 7 Celsius becoming Plus 16 Celsius.
At 600m: Plus 10 Celsius becoming Plus 12 Celsius.
Freezing level: Above the summits.
